

Making and Tinkering as way of knowing:

Engineering, Design, Making, Art

A workshop for libraries, schools and out-of-school time programs

This workshop will guide participants in design/build strategies that can be used in makerspaces and STEAM labs.

Educators will gain skills and experience in integrating engineering with art and design through the practice of making.

**Participants will leave with
Resources and ready to
Implement ideas.**

Workshop Offered:

Friday, January 25, 2019

1 pm - 4 pm

At Explora
