

Teaching Science from a Distance

Strategies for teaching science using Google Meet
For K-12 teachers

Learn, explore, and share strategies for creating high-impact virtual learning experiences using Google Meet and other online platforms. Use a variety of teaching approaches to successfully manage and engage your students. Workshop participants will engage in hands-on science activities, gain experience using Google Meet, and practice creating and presenting a virtual STEM activity.

Workshop Offered:

This **FREE** three-part workshop (Monday, Wednesday, and Friday) will be offered 4 times this spring. See registration link for specific workshop dates.

**Each workshop consists of three 90 min sessions
via Google Meet**

Registration/Information

To register use the form <https://bit.ly/distancescience> or contact Explora.

Workshop offered for FREE due to generous funding provided by AFRL NM
