

## Making + Coding

A virtual workshop for educators, OST and librarians working with students in grades 3-8.

Take making to the next level and include basic coding. This workshop is designed for all skill levels – no previous coding experience required. Learn how to incorporate physical computing into your classrooms using micro:bit microcontrollers and the MakeCode editor to program in blocks or javascript. A micro:bit and accessories will be provided as part of workshop registration.

**Wednesday, September 16, 2020**

**2:30-4:30 pm**

Pre-registration required
