Water Wonders

A virtual workshop for early childhood teachers.
Includes 2 CEU hours

Bring your own water! We will get our hands wet as we make discoveries about water. Experiment with absorption, adhesion, and surface tension. What discoveries can you make about plain water versus salt water? How many drops of water can you fit on a penny?

Participants will leave with a kit of science materials, ready-to-implement ideas, and a membership to NMAEYC.

Thursday, September 10, 2020, 9am–11am

Held virtually. Zoom link will be sent to registrants the day before.

Registration is requested by September 3 so that kits can be shipped ahead of time for up to 20 registrants in the region of Four Corners, to Farmington, to Shiprock, to Gallup. Sharing a login and kit of materials is possible. Please contact Explora Reservations with questions - reservations@explora.us
