

Creative Engineering

A Science and Engineering Virtual Workshop

for educators at schools, libraries, and out-of-school time programs

A creative, hands-on approach to professional learning that engages teachers in grades 3-12 in science and engineering. Participants will receive a classroom kit of resources and phenomenon-based activities to support student exploration of science and engineering practices and cross-cutting concepts.

This workshop provides hands-on experiences in the new STEM Ready! Science standards for educators and staff at schools, libraries, and out-of-school time programs.

Participants will receive a classroom kit of STEM activities and ready-to-implement ideas.

Wed, Nov 10 (4pm - 6pm)

To register: <https://forms.gle/tptefGQHj8FgE9HR9>

These workshops are provided at no cost because of generous support from AFRL.
