Hi Linda!

My library is currently building a Makerspace and I'm trying to get my procedures in order. My goal is to keep everything free for anyone using the equipment and space. I am fortunate to have a community with many people who are eager to donate either supplies or money. For example, we have a local quilter's group who are going to be donating quite a bit of fabric and sewing supplies.

I'm open to changing procedures if it becomes too much of a financial burden but will do everything I can to keep everything in the library accessible to all, no matter their financial position.

I hope this helps a bit.

Hi Linda -

It's been awhile since I have played with it but I found I could order the 3D printer filament in bulk at a lower price. I was working for a larger library at the time and there was no charge to patrons for the printer but it was used in programming rather than as an opportunity to print large items.

I would think for sewing machines it would be a "bring your own" type thing unless it is also being used in programming, in which case maybe charge a materials fee to cover costs?

Best Wishes,

Janet
